

INGRESS BIO
SCIENCE FOR SOIL

INGRESS BIOSOLUTIONS PVT LTD

PHOSPHO-SOL

Why my plant shoots
are not growing and
leaves turning black?

Oh! Farmer this is because
of deficiency of phosphorus.
You must apply Ingress'bio
Phospho- Sol for your
crops.

Phosphate is a major nutrient for plants that help to induce vigorous growth and also contributing to their disease resistance. Phosphate solubilizing bacteria helps to release phosphorus from soil and made available to plants.

1-2 Liter/
acre.

Keep in room
temperature.

Store in cool
& dry place.

Stimulate root
development.

Increases stalk
and strength of
stem.

Improve flower
formation and
seed
production.

Improvement in
resistant
towards plant
disease.

Support in
overall crop life
cycle.

All benefit leads
to crop quality.
